March 2024

Commodity Classic 2024

We had a great time celebrating yield wins and exploring innovations in the agriculture industry at Commodity Classic 2024 held in Houston, Texas from February 28 to March 3! Congratulations to Meier Family Farms for an Asgrow yield contest win with 97 bu/ac, to Terry Carlson for 3rd place in Iowa NCYC with 306 bu/ac, and to the Carlson Seed team for our Dealer Award!

Dicamba Update

The EPA has issued an existing stocks order for over-the-top use of dicamba. Products shipped prior to February 6, 2024 may be used.

Insect Pressure

Expect increased insect pressure this season due to an overall warmer winter, lack of soil frost, and subsequent early start to insect cycles. Consider using insecticide seed treatments or in furrow applications to control pests like wireworms, white grubs, corn rootworm, bean leaf beetle, etc.

Planter Prep

Planting season is almost here -- are you ready? Scan the QR code below for a planter prep checklist!

Spring Seedings

Stop in to purchase small seed and borrow our seeder. If you need a different species, just ask and we can order it in.

- alfalfa
- brome
- clover
- oats
- orchardgrass
- timothy
- pasture mixes
- lawn mixes

Climate FieldView enables you to collect, store, & analyze data on one easy-to-use platform. Use it for planting prescriptions, mapping, scouting notes, reports, and much more this spring.

Increasing Corn Seeding Rates

Optimal seeding rates depend on many factors, including soil type, seed product, fertility, drainage, planting date, and anticipated rainfall. Scan the QR code to the left for more information or talk to our seed experts for help determining what seeding rates are best for your farm.
