Consider Crop Nutrient Removal

The farm economy is tight, but be careful about cutting costs by reducing inputs. Less fertilizer may save money up front, but crop nutrition is key to success in 2026. Consider your crop nutrient removal rate and yield goals before reducing your inputs.

Replace up to 40 lbs of synthetic N with Pivot Bio G3! The gene-edited microbes fix N all season long to feed your crop while improving plant health and yield potential. We have competitive pricing and 0% financing, so it's an easy choice! Order before Oct 29 for the best deals.

Harvest in Full Swing

Harvest is moving right along with the exception of a few rain delays. Corn yields range widely, depending heavily on fungicide applications and hybrid tolerance to Southern rust. Soybeans have been consistently yielding well across the area. We have harvested several plots now, and lots of new numbers are showing up at the top as we push the needle every year on yield potential. Local plot data can be accessed on our website, or you can ask Curt or Meghan for a copy. Let us know how harvest is going for you and send in your photos! We hope you have a happy and safe harvest!

Corn Hybrid Spotlights

Here are a few of our favorites out of our robust lineup that are showing off this year that we would recommend to anyone!

DKC112-12 is a high-yielding hybrid that is showing off its excellent plant health, versatility, and disease tolerance.

DKC114-43 is a hybrid that has a place on any farm with its strong agronomics, disease tolerance, and high yield potential.

DKC114-99 has the VT4Pro trait, so it is suited for rotated or corn-on-corn fields & brings outstanding plant health & high yields.

DKC115-55 is an impressive newcomer with top end yield potential, excellent disease tolerance and stress tolerance.

DKC117-78 has quickly become a favorite due to its versatility & consistency across environments while boasting strong yields.

DKC68-35 offers outstanding yield potential nearly anywhere, with its great agronomic package and stress tolerance.
